

ALEH SITSKO

OPERATIONS-FOCUSED FULL STACK DEVELOPER

Philadelphia, PA | sitskoaleh@gmail.com | github.com/AlehSitsko | alehsitsko.dev | linkedin.com/in/alehsitsko

PROFESSIONAL SUMMARY

Operations-focused full stack developer who builds practical workflow software from real operational experience. Developed and released a production-oriented EMS/NEMT operations platform using React, Python, Flask, SQLAlchemy, PostgreSQL, Redis, Docker, and Electron. Brings hands-on experience in dispatch, workforce coordination, scheduling, process improvement, API design, automated testing, and role-secured business applications. Authorized to work for any employer in the United States.

TECHNICAL SKILLS

Frontend: React, JavaScript ES6+, HTML5, CSS, Bootstrap, Vite, React Router, responsive and accessible UI

Backend: Python, Flask, REST APIs, SQLAlchemy, Flask Blueprints, session authentication, CSRF, role-based access

Data & Infrastructure: PostgreSQL, SQLite, Alembic migrations, Redis, Docker, Nginx, Gunicorn, GitHub Actions

Quality & Tools: pytest, Vitest, Playwright, integration and load testing, Git, GitHub, Postman, Cloudflare Pages

SELECTED PROJECTS

EMS Workflow System | Independent Portfolio Project | Philadelphia, PA

2025 - Present

github.com/AlehSitsko/ems-workflow-system | *Windows release available from GitHub*

- Designed and built a full-stack EMS/NEMT operations platform based on firsthand dispatch and management workflows, covering call intake, scheduling, dispatch, patients, employees, fleet, payroll, leave, tasks, reports, notifications, and audit history.
- Implemented a live dispatch board with drag-and-drop assignment, unit status lifecycle, return rides, priority queues, operational date modes, conflict prevention, and real-time multi-client updates using Server-Sent Events and Redis.
- Built secure multi-organization architecture with invite-only onboarding, server-side sessions, CSRF protection, per-device session revocation, role-based authorization, tenant isolation, recovery codes, and optional AES-256-GCM field encryption.
- Created local and server deployment profiles: Electron + SQLite/Waitress for an offline-capable Windows application, and PostgreSQL + Gunicorn + Redis + Nginx for containerized production deployment.
- Established a comprehensive QA pipeline with 1,400+ automated backend and frontend tests, Playwright browser scenarios, disposable HTTP QA runners, concurrency checks, stress testing, linting, builds, migrations, and CI gates.

Call Taking Form - React Demo | Independent Project |

2025

[Live demo](#) | [Source code](#)

- Built a responsive EMS call-intake prototype with structured data entry, validation, guided workflow, and localStorage persistence; its workflow concepts later evolved into the full EMS Workflow System.

Nexvora Group Website | Independent Project |

2026

[Live demo](#) | [Source code](#)

- Developed and deployed a responsive React/Vite business website with service, contact, and policy pages optimized for clear presentation across desktop and mobile devices.

PROFESSIONAL EXPERIENCE

Operations Manager / EMS Dispatcher | Welcome Ambulance Inc. | Southampton, PA

March 2023 - April 2026

- Managed EMS dispatch operations for BLS, ALS, dialysis, discharge, and NEMT transportation, coordinating daily schedules, crews, vehicles, healthcare facilities, patients, and time-sensitive route changes.
- Reduced scheduled workforce hours from approximately 3,500 to 2,400 per pay period through staffing analysis, schedule redesign, and workflow optimization while maintaining operational coverage.
- Managed employee scheduling, certification compliance, operational documentation, and real-time communication among field crews, EMTs, facilities, patients, and company leadership.
- Converted recurring operational problems into system requirements that directly shaped the architecture, permissions, workflows, and validation rules of the EMS Workflow System.

Deputy Director | OOO Selidan | Hrodna, Belarus

October 2017 - June 2021

- Managed internal operations, workforce coordination, scheduling, and process improvement across departments.
- Coordinated communication among employees, vendors, and management while resolving day-to-day operational issues.

International Freight Dispatcher | Vanpotrans | Poznan, Poland

October 2016 - August 2017

- Coordinated international freight transportation, route planning, driver communication, and customer updates across time-sensitive logistics workflows.

CERTIFICATION & EDUCATION

IBM Full Stack Software Developer Professional Certificate | Coursera / IBM Skills Network |

Completed March 2026

Verify certificate

- Completed hands-on coursework in frontend and backend development, Python, Flask, Django, React, Node.js, SQL, PostgreSQL, cloud-native development, containers, microservices, serverless applications, and CI/CD.

Studies in International Customs Law | Belarusian Institute of Law | Belarus

LANGUAGES

English - Professional working proficiency | **Russian** - Fluent | **Belarusian** - Fluent | **Polish** - Fluent

ADDITIONAL

Location: Philadelphia area, Pennsylvania. Open to software development, internal tools, QA automation, and operations-focused engineering opportunities.
