

ALEH SITSKO

Operations-Focused Full Stack Developer

Philadelphia, PA | sitskoaleh@gmail.com | github.com/AlehSitsko | alehsitsko.dev | [PLACEHOLDER_LINKEDIN](#)

PROFESSIONAL SUMMARY

Operations-focused full stack developer building practical web applications, internal tools, and workflow systems. Combines React, JavaScript, Python, Flask, SQLAlchemy, and SQL fundamentals with hands-on EMS dispatch and operations management experience. Built a full-stack EMS Workflow System based on real-world call intake, crew scheduling, employee tracking, and supervisor visibility needs. Authorized to work for any employer in the United States.

TECHNICAL SKILLS

Frontend:	React, JavaScript ES6+, HTML5, CSS, Bootstrap, Vite, React Router, responsive UI
Backend:	Python, Flask, Flask Blueprints, Flask-CORS, REST APIs, SQLAlchemy
Database:	SQLite, SQL fundamentals, JSON, PostgreSQL basics
Tools:	Git, GitHub, VS Code, Postman, Vercel, Cloudflare Pages, GitHub Pages
Concepts:	CRUD, API integration, client-server architecture, modular component design, role-based access, workflow automation

PROJECTS

EMS Workflow System

React · JavaScript · Python · Flask · SQLAlchemy · SQLite · Bootstrap

github.com/AlehSitsko/ems-workflow-system

Full-stack operational workflow system for EMS/NEMT-style environments, built from real dispatch and operations experience and designed around practical workflow needs.

- Built modular React frontend and Flask REST API backend for call intake, patient lookup, employee tracking, crew planning, and supervisor analytics.
- Implemented role-based access for admin, supervisor, dispatcher, and HR workflows.
- Developed call intake validation with quality scoring, missing field analysis, duplicate patient prevention, return ride logic, and structured data entry.
- Added employee management with certification tracking and role-based crew assignment validation.
- Built crew planner with daily unit scheduling, crew presets, and shift management.
- Added supervisor analytics for dispatcher performance, average quality score, and missing information trends.
- Organized backend using Flask Blueprints, SQLAlchemy models, REST routes, and SQLite database structure.
- Designed the system around real EMS dispatch workflow problems: incomplete information, scheduling pressure, crew coordination, and supervisor visibility.

Call Taking Form — React Demo

React · JavaScript · Bootstrap · GitHub Pages · localStorage

github.com/AlehSitsko/Call-Taking-Form-React | alehsitsko.github.io/Call-Taking-Form-React

- Built a frontend EMS call intake prototype with structured form flow, validation, and guided data entry.
- Used localStorage to simulate saved call records and user workflow.
- Created as an early prototype of workflow concepts later expanded into the EMS Workflow System.

Nexvora Group Website

React · Vite · JavaScript · CSS · Vercel

github.com/AlehSitsko/Nexvora_Group | nexvora-group.vercel.app

- Built a responsive business website demo for a wholesale and e-commerce company.
- Created professional service sections, contact structure, policy pages, and mobile-friendly layout.
- Deployed live preview through Vercel.

PROFESSIONAL EXPERIENCE

Operations Manager / EMS Dispatcher

Welcome Ambulance Inc · Southampton, PA · March 2023 – April 2026

- Managed EMS dispatch operations for BLS, ALS, dialysis, discharge, and NEMT transportation, coordinating crews, scheduling, and real-time route adjustments.
- Reduced scheduled workforce hours from approximately 3,500 to 2,400 per pay period through staffing, scheduling, and workflow optimization.
- Identified operational workflow inefficiencies that directly informed the architecture and feature design of the EMS Workflow System project.
- Served as a communication bridge between field crews, EMTs, healthcare facilities, patients, and management in a high-pressure environment.
- Managed employee scheduling, certification compliance, and operational documentation across BLS and ALS units.

Deputy Director

OOO Selidan · Hrodna, Belarus · October 2017 – June 2021

- Managed internal operations, workforce coordination, scheduling, and process improvement across departments.
- Coordinated communication between staff, vendors, and management.

International Freight Dispatcher

Vanpotrans · Poznan, Poland · October 2016 – August 2017

- Coordinated international freight transportation, route planning, driver communication, and client updates.
- Managed dispatch communication across time-sensitive logistics workflows.

CERTIFICATIONS & EDUCATION

IBM Full Stack Software Developer Professional Certificate

Coursera / IBM Skills Network · Completed March 2026

coursera.org/account/accomplishments/specialization/NMZB7BRO9C6E

Completed a professional certificate covering full stack application development, frontend and backend development, cloud-native concepts, databases, containers, microservices, serverless workflows, CI/CD, and deployment fundamentals.

Topics: HTML, CSS, JavaScript, Git, GitHub, React, Node.js, Express, Python, Flask, Django, SQL, PostgreSQL, Docker, Kubernetes, OpenShift, microservices, serverless, CI/CD, full stack application development.

Belarusian Institute of Law

Studies in International Customs Law
